VIZIONCORE OFFERS vCONTROL MULTI-HYPERVISOR MANAGEMENT AS FREWARE

*Manages VMware ESX, Microsoft Hyper-V and Citrix XenServer
through a single console*

VMworld, San Francisco, Booth #1402 September 1, 2009 – Vizioncore Inc., the market leader in [virtualization data protection and management solutions](#), today announced that vControl's multi-hypervisor management capability will now be available for free. Customers who have VMware ESX infrastructures, Microsoft Hyper-V, and Citrix XenServer infrastructure can now manage these environments through a single console – helping to reduce administration costs and improve management consistency.

vControl Multi-Hypervisor Management provides a browser-based interface that enables control of multiple platforms, allowing administrators to leverage easy-to-trigger workflows for task-based administration of VMs. Furthermore, vControl Multi-Hypervisor Management provides a cost-effective solution for high availability in the data center.

Vizioncore's initiative to offer free tools that accelerate virtualization adoption started earlier this year with the launch of the Virtualization EcoShell Initiative (VESI). Virtualization EcoShell focuses on script-based VM administration, providing a powerful personal productivity solution to VM administrators. With vControl Multi-Hypervisor Management, organizations can readily leverage out-of-the-box workflows as well as any scripts they have built using Virtualization EcoShell, helping them centralize, standardize and tackle the most challenging and time-consuming tasks in the virtual infrastructure.

“The rapid adoption of virtualization has led to an increase in VM administration costs and management burden,” explains Mike Condy, Vizioncore vControl product manager. “To help organizations gain the benefits of virtualization without added costs, and to help organizations gain control of their virtual infrastructures, we are offering vControl’s Multi-Hypervisor Management capability for free.”

In addition to vControl Multi-Hypervisor Management, Vizioncore offers vControl Self-Service Provisioning for \$399/socket. With this product VM consumers can build and provision VMs for themselves through customizable VM templates.

vControl Multi-Hypervisor Management can be downloaded for free [here](#) , and more information on vControl Multi-Hypervisor can be found [here](#). At VMworld 2009, visitors are invited see both solutions in action alongside other Vizioncore free and commercial products at booth #1402.

Vizioncore is also announcing additional free editions of their products including vConverter SC and vOptimizer Wastefinder. To learn more details and begin using these products today, please visit www.vizioncore.com/free.
